Lomar Machine & Tool Co. Announces Strategic Partnership with SKW Automation

Lomar Machine & Tool Co., a leader in custom machinery innovation, design and build is pleased to announce a partnership with SKW Automation, a skilled provider of automation integration solutions. This collaboration aims meet growing industry demands for robotic incorporation into production processes by leveraging both companies' expertise. SKW operations are now located at Lomar's 5881 Coats Road facility.

The partnership between Lomar and SKW represents a significant step towards piloting robotic advancements and efficiency trends in the manufacturing sector. By integrating SKW's advanced automation into Lomar's range of custom machinery, this alliance is poised to offer enhanced solutions that improve production speed, quality, and flexibility in a variety of industries.

"Lomar is excited for this collaboration and the vast ways SKW will support our efforts to solve the evolving challenges of our customers." states Ronald Geisman, CEO and President of Lomar Machine & Tool Co. "Kevin and Jake of SKW bring remarkable expertise of automation opportunities to the industrial equipment being designed and built in our facilities. Their skills complement our commitment to delivering high-quality products to customers worldwide."

Kevin Wood of SKW states, "Partnering with Lomar Machine & Tool Co. will allow us new ways to integrate our automation services through their design processes. Together, we will strengthen our capabilities to better serve customers and drive growth."

This partnership underscores both companies' dedication to innovation and customer satisfaction. By pooling their strengths, Lomar Machine & Tool Co. and SKW Automation aim to set new benchmarks in the manufacturing industry while ensuring streamlined operations and superior service.

About Lomar Machine & Tool Co.: Lomar Machine & Tool Co. is a Designer, Manufacturer and Integrator of standard and custom machines for hose crimping, tube end forming, tube bending, brazing, leak test systems and assembly machines. With a commitment to quality and innovation, Lomar is dedicated to meeting the evolving needs of its clients.

About SKW Automation: SKW Automation is a leading provider of automation solutions, offering cutting-edge technologies to optimize manufacturing processes. With a focus on efficiency and reliability, SKW Automation delivers tailored automation solutions that drive operational excellence.
